Population Density – 4 level map analysis

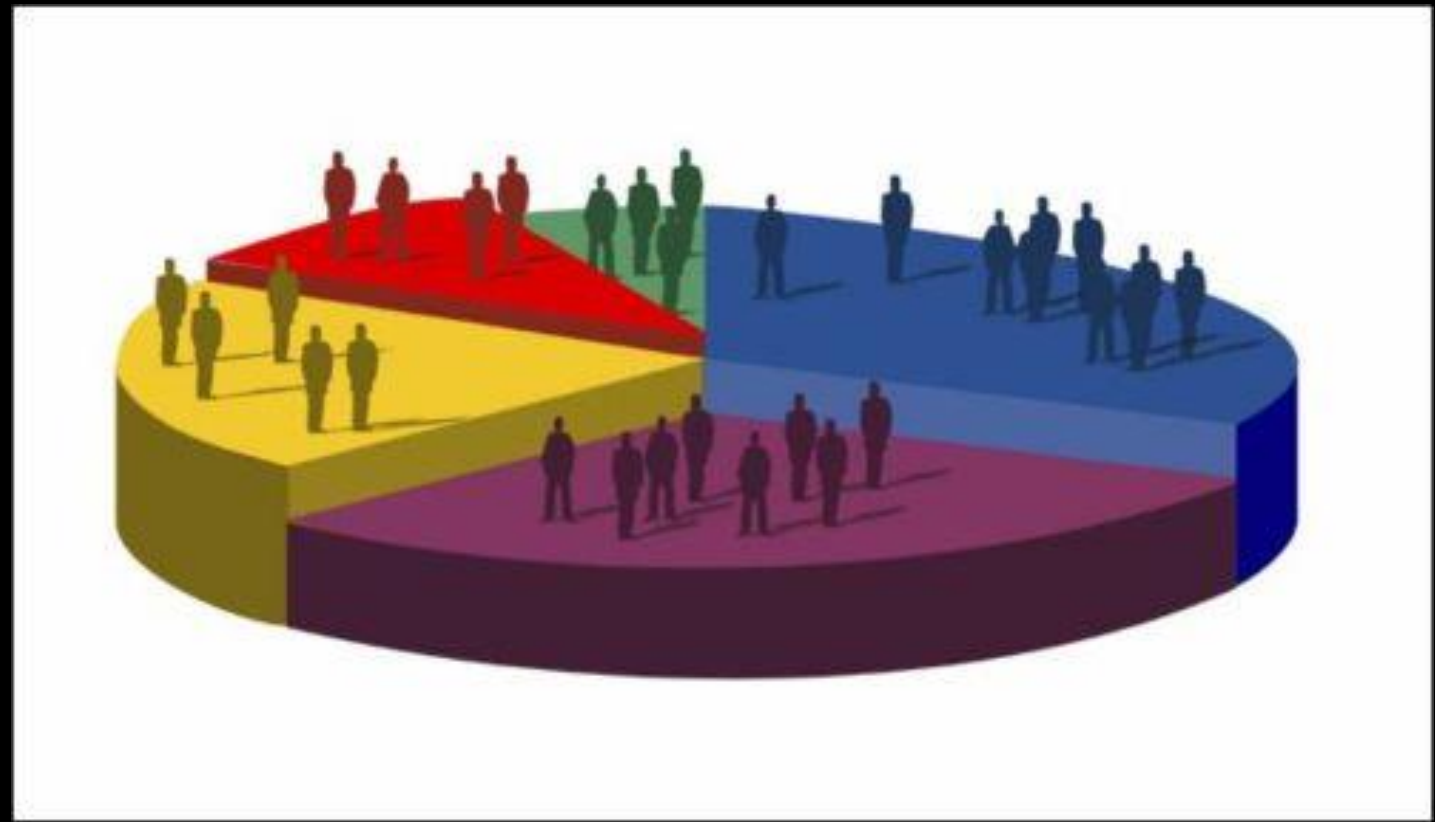

Population Pyramids-Graphic device used to analyze population

Example: Afghanistan and France

Demographics tell us information about the people in a certain place
Mostly collected by the Census Bureau in the US

- Age
- Sex
- Race
- Ethnicity

Race V. Ethnicity

- Race – based on biologically transmitted traits
- Ethnicity – cultural language, religion, heritage, customs

Ethnicity Example:

In Canada, the main language is English, however, in Quebec (Eastern Canada) the first language is French.
